Marek Szumny

A highly effective, ambitious, motivated and widely experienced engineer who spends the last few years of his professional career dealing with e-commerce processes automation including online store launching, sales platforms parametrization and configuration, integrations with BaseLinker, invoice & sales management software changes, data migrations, updates and improvements management, etc.

Creative mind, great team player, organizer and manager with a high level of soft skills, experienced in work and building good relationships with private and business clients.

Due to the fact, I was always related and I'm still closely related to technology, IT and gaming (analog also) industries I decided to go back to my roots and jump in again into the ocean of exciting opportunities which the IT industry is.

I'm 100% sure I want to stay in this exciting industry for a long time, so I'm investing all my time and effort every day to develop my technical skills and keep this career path.
